Unveil a New Reality: Lifelike Beauty in 4K HD Clarit

How does it work

Multi-wavelengths and colorful wide spectrums produced by Intense Pulsed Light penetrate into epidermis and reaches dermis. Acting on abnormal pigment cells and target vascular tissue, IPL dissolves abnormal pigments, closes abnormal vessels, and stimulates regeneration of collagen. Then, elastic fibers will be rearranged and effects of pigments removal and skin rejuvenation will be achieved. This treatment is targeted, symptoms pointed and energy sufficient.

1 week-2 weeks 3 week-4 weeks 5 week-8 weeks

Elight handle

High-quality IPL handpiece with super cooling system

Optional Spot Size
15*50mm, 15*35mm, 12*30mm
